

Seventeenth International Linguistics Olympiad

Yongin (Republic of Korea), 29 July – 2 August 2019

Team Contest Solution

49	$\otimes R_3 Z \downarrow$	0.6	does a large throw of the apparatus: outside of visual control catches the apparatus: rolls the apparatus
50	$\rightarrow (\neq \odot)$	0.2	does a small throw of the hoop catches the hoop: without the help of hands, the hoop rotates around a part of the gymnast's body
51	$\downarrow (\neq \neq)$	0.4 0.2	does a large/medium throw of the apparatus catches the apparatus: under the leg, during a rotation
52	$\rightarrow (\neq \odot \Theta)$	0.2	does a small throw of the apparatus: the apparatus rotates around its axis, without the help of hands, during a rotation
53	$\Theta (\neq \odot)$	0.2	rotates the apparatus around its axis: without the help of hands, during a rotation
54	$\lambda \odot (\neq =)$	0.2	holds the hoop in an unstable balance: without the help of hands or while on the floor rotates the hoop around a part of the gymnast's body: without the help of hands or while on the floor
55	$\odot \rightarrow (\neq \otimes)$	0.2 0.1	rotates the apparatus around its axis on the floor: without the help of hands, outside of visual control does a small throw of the apparatus: without the help of hands, outside of visual control
56	\downarrow_2	0.6	performs a 360°–539° rotation on her toes, leg is held up and to the side with the help of a hand, trunk is horizontal
57	$\infty (= \neq)$	0.4	does a large throw of the hoop bounces the hoop: while on the floor, under the leg
58	$\Theta (= \neq \odot)$ $\infty (= \neq \odot)$	0.2	rotates the ball around its axis: while on the floor, without the help of hands, during a rotation
59	$\lambda \infty (\neq)$	0.2	holds the hoop in an unstable balance: without the help of hands bounces the hoop off the floor: without the help of hands
60	$\infty \otimes (\neq \otimes)$	0.3	transmits the ball from one part of the body to another: without the help of hands rolls the ball: without the help of hands, outside of visual control

61		0.9	<p>does a large throw of the hoop</p> <p>does a turn with the torso bending down and two 360° rotations around a vertical axis</p> <p>bounces the hoop: without the help of hands, outside of visual control, during a 360° rotation around a vertical axis</p>
62		0.4	<p>does a large throw of the hoop: outside of visual control, during a walkover/cartwheel</p> <p>catches the hoop: passes through the hoop, during a walkover/cartwheel</p>
63		0.2	<p>does a large throw of the ball</p> <p>does two 360° rotations around a vertical axis and one 180° rotation around a vertical axis, goes down on the floor</p> <p>catches the ball</p>
64		0.2	performs a stag leap: leg in the ring position
65		0.3	performs a stag leap: with a 360° turn
66		0.5	performs a split leap: with a 360° turn, leg in the ring position
67		0.3	performs a side split leap
68		0.4	performs a split leap: with a 180° turn
69		0.4	performs a stag leap: with a 180° turn, bends her back backwards
70		0.4	performs a split leap: bends her back backwards, leg in the ring position
71		0.8	performs a 1620° rotation on her toes, free leg is back and horizontal, trunk is vertical
72		0.4	performs a balance on her toes, free leg is in front and up, trunk is vertical
73		0.5	performs a 270° rotation on her toes, free leg is in front and up, trunk is horizontal
74		0.5	performs a balance on her toes, free leg is to the side and horizontal, trunk is horizontal
75		0.2	performs a balance on flat foot, leg is held up and back with the help of a hand, trunk is vertical
76		0.4	performs a 360° rotation on her toes, leg is held up and back with the help of a hand, trunk is horizontal
77		—, 0	performs a 180° rotation on her toes and a 360° rotation on flat foot, free leg is to the side and horizontal, trunk is horizontal
